Part I  Nature and Human Economics

1  Technology, Business and Nature: An Economic Primer on Winners and Losers
2  Women, Wall Street and Mitigating Climate Change: The Critical Importance of WOCAN
3  The New Business of Business: Evolution of Culture and The Survival of Humankind
4  Wall Street After Rio: A Discussion with Calvert Investments’ Senior Sustainability Research Analyst, Ms. Ellen Kennedy
5  Investing in the End Game? An EarthDay Post-Mortem

## Part I: Nature and Human Economics

1. **Technology, Business and Nature: An Economic Primer on Winners and Losers**
   - References
   - Pages: 3

2. **Women, Wall Street and Mitigating Climate Change: The Critical Importance of WOCAN**
   - References
   - Pages: 11

   - Avoiding “Catastrophic Bifurcation”
   - The Compelling Role of Consciousness
   - Purposeful Survival
   - Business People and the Chances of Human Survival
   - References
   - Pages: 17

4. **Wall Street After Rio: A Discussion with Calvert Investments’ Senior Sustainability Research Analyst, Ms. Ellen Kennedy**
   - References
   - Pages: 24

5. **Investing in the End Game? An EarthDay Post-Mortem**
   - Food, Sex and Water
   - New Asset Classes
   - The Tragedy of the Commons
   - A Mouthful of Complexities
   - Beautiful, But Sluggishly Green
   - Biological Economics
   - References
   - Pages: 30

## Part V  Ecological Heroes

- **20 One Woman’s Remarkable Quest to Save Africa’s White Lion**  
  In the Heart of Africa ................................................................. 129  
  The Crisis .................................................................................. 131  
  The Complexity of the Crisis .................................................... 132  
  Solutions .................................................................................... 132  
  Wall Street’s Role in Protecting Africa’s Biodiversity ............. 133  
  References ................................................................................ 135

- **21 The Heroism of Everyday: A Discussion with UNOPS Luminary, Ms. Maria-Noel Vaeza**  
  References ................................................................................ 143

- **22 Down To Earth: The World According to Ted Turner**  
  References ................................................................................ 152

- **23 How the Life of a Chipmunk in Michigan Came to Save Elephants and a Million Acres in Cambodia**  
  Cambodia’s Paradise .................................................................... 153  
  The Story of a Lifetime ................................................................ 154  
  The Logic and Urgency of World Conservation ....................... 156  
  Of Starfish and Elephants ....................................................... 158  
  The Future: A Race Against Time ........................................... 159  
  The Big Question ....................................................................... 161  
  Coda ......................................................................................... 161  
  References ................................................................................ 162

- **24 Helen Clark: UNDP’s Pragmatic Visionary**  
  References ................................................................................ 170

- **25 A Jain Leader Addresses the World**  
  References ................................................................................ 179

- **26 A Discussion with Jane Goodall**  
  Reference .................................................................................. 187

## Part VI  The State of the World

- **27 China Declares Global State of Emergency: An Urgent Telegram from Taihu**  
  References ................................................................................ 199

- **28 Japan’s Tragedy: Global Ecological Uncertainty**  
  References ................................................................................ 204
Table of Contents

29 Before the Fall: Syria’s Ecosystems .......................................................... 205
    Syria’s Biodiversity ........................................................................... 205
    Syria’s Ecological Commitments and Her Future? ........................... 207
    References ......................................................................................... 209

30 Sir Simon Jenkins, England’s National Trust, and the Future of Conservation in Great Britain ........................................ 211
    References ......................................................................................... 217

31 Extinction: Poachers Test the Right to Life ..................................... 219
    References ......................................................................................... 225

Part VII Animal Rights

32 Compassionate Conservation: A Discussion from the Frontlines with Dr. Marc Bekoff .................................................. 231
    References ......................................................................................... 242

33 Animal Rights in China .................................................................... 245
    References ......................................................................................... 254
